British Columbia	17732	2013 Turbosaw Gladiator. Approx. 3500hrs. 46hp Kubota diesel. Max log diameter: 72". Ideal log diameter: 48". Max log Length: 44'. Max depth of cut: 12" (12x12 without turning the log). Setworks: Fully automated electric/hydraulic with unlimited taper sawing capabilities on both the vertical and horizontal axis. Can be adjusted at anytime to cut parallel with the outside of the log to eliminate grain runout. Ideal for cutting around Western Red Cedar defects Production numbers: 3000-8000 bd ft per day with 3 men depending on species and lumber dimensions Handling system: Drag back plate capable of removing beams up to 500lbs Spare parts: 6 blades, spare gear box, bearings, chain coupler, sharpener Upgrades since 2013: Hydraulic hoses: All hydraulic hoses were replaced in 2013 Blade alignment bolts: Alignment bolts installed to adjust the blade lead in/lead out for both the horizontal and vertical positions Remote starting system: Starting box and throttle control is now by the operator next to the setworks. This not only ensures operator safety but 30% fuel consumption as the mill can be idled down quickly and safely in between logs New Hydraulic motor and mounting system: This was replaced in 2014 with a new hydraulic motor and a metal bracket mounted directly to the motor. Metal coupler was replaced with traditional love joy style coupler to take up any vibrations Re-enforced secondary with chain coupler: Steel Plates and chain coupler installed to eliminate gearbox and coupler failure Canadian \$45,000	\$45,000.00

Connecticut	17427	Complete Operation of Hand Set Circular Sawmill in Connecticut. Great Restoration Project! Equipment is as follows: Cat diesel generator, There is a second generator manufactured by "Katolight", circular hand-set Chase sawmill, Debarker, Edger, all necessary decks and green chains for lumber production. There is a frame for a Corley automatic mill carriage in a state of 're-building'. There is also a second edger, mauf by Corley, also in a state of 're-building'. There is a never-installed log turner/deck mfg by Mellott Manf meant to go between log deck & debarker. Kept under cover since delivered. Room for improvements. Equipment is older and business has not been active. Gen set was recently serviced, started and has brand new batteries. This is a large operation, not a backyard mill. It is ideal for a younger generation to branch away on their own if they have distinct goals in mind as to what they would like to manufacture. The area here has several large mills but not a lot of options for custom sawing which is what we did. Equipment is not 'for sale' individually.	\$40,000.00 <i>Reduced</i>

Pennsylvania	17891	Laimet Screw Chipper Model HP-21: Like new! Only 1 hour. Max. wood diam. 170 mm Feeding throat 210 x 315 mm Power source 90 kW tractor (min.) Quantity of chips up to 40 m ³ / hour with speed of rotation 540 rpm Weight of the machine 1100 kg PTO Rotation speed 540...1000 rpm Reliable basic chipper for agricultural and forestry use as well contract chipping. The heart of the chipper is the conical screw blade. The Laimet HP chippers uses a conical screw blade, which efficiently produces splinter free even quality chips. The rotating screw blade also functions as a feed unit so that a separate feed is unnecessary. The LAIMET is a tractor or diesel powered chipper of remarkably simple construction. It has few parts that wear. It is reliable in operation and needs little maintenance. The heavy fly-wheel evens out the load on the motor used.	\$15,000.00
Pennsylvania	16786	64" Nicholson Chipper. No power. Rebuilt.	\$12,500.00

STATE	AD #	Industrial Equipment	PRICE (U.S.)
Kentucky	18056	We used this plant on farm until last year. It functions very well. Also included is an extra Detroit Diesel engine and full set of original manuals with all schematics and part numbers. Video of plant in operation taken June 14 2017 available. We will load this unit on your trailer. Questions welcome Cedarapids Senior Commander model 443 is a portable aggregate plant, also known as a jaw crusher. Unlike other crushers from Extec or Metso, the 443 is capable of feeding the raw material back through the crusher until the desired size of aggregate material is reached due to having both a jaw Crusher and a roll Crusher. This produces a finished product that is suitable for retail. The 443 has 2 48"-10' screens, 200-320 TPH capacity, is 35 feet long and weighs 62,510 pounds.	\$39,500.00
Washington	17291	Allen-Bradley PowerFlex 7000 Power Supply Components: Air-Cooled Drive Unit & Components contained in 10 cabinets on pallets weighing approximately 35,000 lbs. total weight New components that have never been used and are in excellent condition. Description Details: Capabilities Across a Broad Range of Applications The PowerFlex 7000 drive is a flexible, easy-to-use solution designed to meet diverse application requirements across a wide spectrum of heavy industrial settings. Controls speed, torque and direction of induction or synchronous AC motors, normal duty or heavy duty. Broad power range: 150 kW to 25,400 kW (200 Hp to 34,000 Hp) Achieves near unity power factor throughout the typical operating speed range for variable torque loads Virtually perfect sinusoidal current and voltage waveforms allow use of standard motors Accommodates motor cable lengths up to 15 km EtherNet/IP™ communication interface. Optional interfaces for a variety of network protocols Drive control: Sensorless vector control or full vector control with tachometer feedback (optional) Flexible input configurations: Direct-to-Drive (transformerless), Active Front End (AFE) rectifier or 18-pulse rectifier Patented PowerCage™ allows SGCT replacement in less than ten minutes Achieve requirements for Safety Integrity Level 3 (SIL 3) and Performance Level e (PL e) with TÜV Certified Safe Torque Off Premier Integration into the Logix control platform with Studio 5000 Logix Designer™ software reduces development and integration time Robust Design -- PowerFlex 7000 higher power drive structures are designed to help contain and redirect energy in the event of an incident with enhanced enclosures and fault containment. Help reduce downtime with built-in diagnostic and detection features that monitor the health of drive components. Synchronous bypass and transfer to control multiple motor systems • Local and remotely mounted HMI options.Remote Virtual Support Engineer™ service available CATALOG NUMBERS OF MAJOR COMPONENTS: 1.
