Alaska	17726	Mobile Dimension Sawmill with VW gas engine rebuilt in 2011. 2 Edger blades, 20' track. Hydraulic controls. Trailer dolly.	\$16,000.00
Alberta	16891	D & L Double Cut. 36 HP diesel motor. Hydraulics run by 20 HP gas motor. Capacity 10" deep X 6" wide. Portable on wheels. Has return for lumber to come back to operator. Logs are held solid on deck, rulers on the back set the cut required. Great saw for 1/4 sawn lumber. 200 hours.	\$16,000.00
Alberta	16888	52" Head Saw with 250 HP Cat motor.	\$25,000.00
Arkansas	17645	Custom Built Circular Saw with edger, 671 Detroit diesel power unit, industrial air compressor and saw dust remover. Built in 2007. Hydraulic. Cap 24' long. Has 56" blade.	\$12,000.00
British Columbia	17732	2013 Turbosaw Gladiator. Approx.3500hrs. 46hp Kubota diesel. Max log diameter: 72". Ideal log diameter: 48". Max log Length: 44'. Max depth of cut: 12" (12x12 without turning the log). Setworks: Fully automated electric/hydraulic with unlimited taper sawing capabilities on both the vertical and horizontal axis. Can be adjusted at anytime to cut parallel with the outside of the log to eliminate grain runout. Ideal for cutting around Western Red Cedar defects Production numbers: 3000-8000 bdf per day with 3 men depending on species and lumber dimensions Handling system: Drag back plate capable of removing beams up to 500lbs Spare parts: 6 blades, spare gear box, bearings, chain coupler, sharpener Upgrades since 2013: Hydraulic hoses: All hydraulic hoses were replaced in 2013 Blade alignment bolts: Alignment bolts installed to adjust the blade lead in/lead out for both the horizontal and vertical positions Remote starting system: Starting box and throttle control is now by the operator next to the networks. This not only ensures operator safety but 30% fuel consumption as the mill can be idled down quickly and safely in between logs New Hydraulic motor and mounting system: This was replaced in 2014 with a new hydraulic motor and a metal bracket mounted directly to the motor. Metal coupler was replaced with traditional love joy style coupler to take up any vibrations Re-enforced secondary with chain coupler: Steel Plates and chain coupler installed to eliminate gearbox and coupler failure Canadian \$45,000	\$45,000.00

Connecticut	17427	Complete Operation of Hand Set Circular Sawmill in Connecticut. Great Restoration Project! Equipment is as follows: Cat diesel generator, There is a second generator manufactured by "Katolight", circular hand-set Chase sawmill, Debarker, Edger, all necessary decks and green chains for lumber production and JD544 Loader, Clark Cable Skidder model 665D. There is a frame for a Corley automatic mill carriage in a state of 're-building'. There is also a second edger, mauf by Corley, also in a state of 're-building'. There is a never-installed log turner/deck mfg by Mellott Manf meant to go between log deck & debarker. Kept under cover since delivered. There is a 1974 International Log Truck with log loader, needs repairs to hydraulic lines but does start and run. Room for improvements. Equipment is older and business has not been active. Gen set was recently serviced, started and has brand new batteries. This is a large operation, not a backyard mill. It is ideal for a younger generation to branch away on their own if they have distinct goals in mind as to what they would like to manufacture. The area here has several large mills but not a lot of options for custom sawing which is what we did. Equipment is not 'for sale' individually.	\$69,500.00 <i>Reduced</i>
Missouri	17556	Complete Circular Sawmill Operation including sawmill, edger, chop saw, resaw, hog, blowers, motors. Pennsylvania	17891 New	Laimet Screw Chipper Model HP-21: Like new! Only 1 hour. Max. wood diam. 170 mm Feeding throat 210 x 315 mm Power source 90 kW tractor (min.) Quantity of chips up to 40 m ³ / hour with speed of rotation 540 rpm Weight of the machine 1100 kg PTO Rotation speed 540...1000 rpm Reliable basic chipper for agricultural and forestry use as well contract chipping. The heart of the chipper is the conical screw blade. The Laimet HP chippers uses a conical screw blade, which efficiently produces splinter free even quality chips. The rotating screw blade also functions as a feed unit so that a separate feed is unnecessary. The LAIMET is a tractor or diesel powered chipper of remarkably simple construction. It has few parts that wear. It is reliable in operation and needs little maintenance. The heavy fly-wheel evens out the load on the motor used.	\$15,000.00
Pennsylvania	16874	Morbark 48" Chipper with Blower. No power. Includes 40 knives.	\$6,000.00 <i>Reduced</i>

STATE	AD #	Industrial Equipment	PRICE (U.S.)
Washington	17291	Allen-Bradley PowerFlex 7000 Power Supply Components: Air-Cooled Drive Unit & Components contained in 10 cabinets on pallets weighing approximately 35,000 lbs. total weight New components that have never been used and are in excellent condition. Description Details: Capabilities Across a Broad Range of Applications The PowerFlex 7000 drive is a flexible, easy-to-use solution designed to meet diverse application requirements across a wide spectrum of heavy industrial settings. Controls speed, torque and direction of induction or synchronous AC motors, normal duty or heavy duty. Broad power range: 150 kW to 25,400 kW (200 Hp to 34,000 Hp) Achieves near unity power factor throughout the typical operating speed range for variable torque loads Virtually perfect sinusoidal current and voltage waveforms allow use of standard motors Accommodates motor cable lengths up to 15 km EtherNet/IP™ communication interface. Optional interfaces for a variety of network protocols Drive control: Sensorless vector control or full vector control with tachometer feedback (optional) Flexible input configurations: Direct-to-Drive (transformerless), Active Front End (AFE) rectifier or 18-pulse rectifier Patented PowerCage™ allows SGCT replacement in less than ten minutes Achieve requirements for Safety Integrity Level 3 (SIL 3) and Performance Level e (PL e) with TÜV Certified Safe Torque Off Premier Integration into the Logix control platform with Studio 5000 Logix Designer™ software reduces development and integration time Robust Design – PowerFlex 7000 higher power drive structures are designed to help contain and redirect energy in the event of an incident with enhanced enclosures and fault containment. Help reduce downtime with built-in diagnostic and detection features that monitor the health of drive components. Synchronous bypass and transfer to control multiple motor systems • Local and remotely mounted HMI options.Remote Virtual Support Engineer™ service available CATALOG NUMBERS OF MAJOR COMPONENTS: 1.
