Pennsylvania	17891	Laimet Screw Chipper Model HP-21: Like new! Only 1 hour. Max. wood diam. 170 mm Feeding throat 210 x 315 mm Power source 90 kW tractor (min.) Quantity of chips up to 40 m <sup>3</sup> / hour with speed of rotation 540 rpm Weight of the machine 1100 kg PTO Rotation speed 540...1000 rpm Reliable basic chipper for agricultural and forestry use as well contract chipping. The heart of the chipper is the conical screw blade. The Laimet HP chippers uses a conical screw blade, which efficiently produces splinter free even quality chips. The rotating screw blade also functions as a feed unit so that a separate feed is unnecessary. The LAIMET is a tractor or diesel powered chipper of remarkably simple construction. It has few parts that wear. It is reliable in operation and needs little maintenance. The heavy fly-wheel evens out the load on the motor used.	\$11,900.00 <i>Reduced</i>
Pennsylvania	18035	58" Morbark Chip Pack. Many new parts. Currently operating.	\$25,000.00

Kentucky	18056	We used this plant on farm until last year. It functions very well. Also included is an extra Detroit Diesel engine and full set of original manuals with all schematics and part numbers. Video of plant in operation taken June 14 2017 available. We will load this unit on your trailer. Questions welcome Cedarapids Senior Commander model 443 is a portable aggregate plant, also known as a jaw crusher. Unlike other crushers from Extec or Metso, the 443 is capable of feeding the raw material back through the crusher until the desired size of aggregate material is reached due to having both a jaw Crusher and a roll Crusher. This produces a finished product that is suitable for retail. The 443 has 2 48"-10' screens, 200-320 TPH capacity, is 35 feet long and weighs 62,510 pounds.	\$39,500.00
Washington	17291	Allen-Bradley PowerFlex 7000 Power Supply Components: Air-Cooled Drive Unit & Components contained in 10 cabinets on pallets weighing approximately 35,000 lbs. total weight New components that have never been used and are in excellent condition. Description Details: Capabilities Across a Broad Range of Applications The PowerFlex 7000 drive is a flexible, easy-to-use solution designed to meet diverse application requirements across a wide spectrum of heavy industrial settings. Controls speed, torque and direction of induction or synchronous AC motors, normal duty or heavy duty. Broad power range: 150 kW to 25,400 kW (200 Hp to 34,000 Hp) Achieves near unity power factor throughout the typical operating speed range for variable torque loads Virtually perfect sinusoidal current and voltage waveforms allow use of standard motors Accommodates motor cable lengths up to 15 km EtherNet/IP™ communication interface. Optional interfaces for a variety of network protocols Drive control: Sensorless vector control or full vector control with tachometer feedback (optional) Flexible input configurations: Direct-to-Drive (transformerless), Active Front End (AFE) rectifier or 18-pulse rectifier Patented PowerCage™ allows SGBT replacement in less than ten minutes Achieve requirements for Safety Integrity Level 3 (SIL 3) and Performance Level e (PL e) with TÜV Certified Safe Torque Off Premier Integration into the Logix control platform with Studio 5000 Logix Designer™ software reduces development and integration time Robust Design - PowerFlex 7000 higher power drive structures are designed to help contain and redirect energy in the event of an incident with enhanced enclosures and fault containment. Help reduce downtime with built-in diagnostic and detection features that monitor the health of drive components. Synchronous bypass and transfer to control multiple motor systems • Local and remotely mounted HMI options.Remote Virtual Support Engineer™ service available CATALOG NUMBERS OF MAJOR COMPONENTS: 1.
